

Enquiries and placements at Wonder Star Futures

Opening January 2027

A specialist post-16 college supporting young people aged 16–25 with EHCPs to develop the skills, confidence and independence needed for adult life.

Who our college is for

We welcome enquiries from and on behalf of young people with an Education, Health and Care Plan who need a personalised and supportive route through further education. We are a small setting and our offer is bespoke to the learner. A learner's starting point, interests and aspirations help shape their programme.

Suitability depends on the individual. We consider the learner's educational, communication, wellbeing, medical and personal care needs alongside the support, staffing and facilities required. We will be clear if we cannot meet those needs safely and effectively.

Learning and support

Our offer balances academic learning with exploring employment options, practical skills for adult life, opportunities to develop friendships and the enjoyment of belonging to a college community.

- English and maths, including Functional Skills qualifications where appropriate to the learner's starting point and goals.
- Practical learning through ASDAN Lifeskills Challenge, including independent living, health, wellbeing and relationships.
- Careers learning, work experience and volunteering shaped around learner interests and suitability.
- Communication support, accessible resources and individual learning approaches informed by the learner's needs and EHCP.

We plan learning around EHCP outcomes and review progress with the learner and those involved in their support. The curriculum overview provides more detail about our five learning areas: Learn, Work, Wellbeing, Belong and Independence.

Exploring a place at Wonder Star Futures

An initial conversation is the best starting point. Learners, families, SENCOs and other professionals can contact us for an initial conversation and to discuss arranging a visit as part of planning a young person's next step.

Wonder Star Futures is not currently formally approved under Section 41 of the Children and Families Act 2014. Families and young people can ask their local authority to consider our provision. Any local authority funded placement will require agreement about suitability, the provision specified in the EHCP and funding before a place is confirmed.

Practical information
